WORK EXPERIENCE

Norstella - Principle Product Manager, Data Science **2024-current**

- Delivered 5+ AI/ML products to production including near-real-time payer policy alerting (reduced alert time from 1 week to 1 day), real-world data notes analysis ($500k new sales in Q4 2025), and document intelligence tools (reducing payer document processing overhead by ~50%)—establishing evaluation frameworks and success metrics for each.
- Defined AI strategy and roadmap for market access and HEOR products, leading strategic planning offsites, establishing project scoping frameworks, creating single canonical roadmap, facilitating monthly portfolio reviews with senior stakeholders, creating evaluation processes and success metrics for enterprise AI initiatives.
- Built AI literacy and enablement programs including executive education sessions, internal AI wiki, Show & Tell series, and sales enablement training—accelerating AI adoption across non-technical teams.
- Established data science team operating model including collaboration frameworks, office hours for business partners, API consumption menus, and onboarding guides—scaling AI delivery capacity across Market Access and HEOR functions.

Clarivate - Lead Product Manager, Academic AI Platform **2023-2024**

- Built and launched enterprise AI platform from 0→1, delivering LLM, embedding, vector search, and document intelligence APIs—reducing developer onboarding time from 3-4 weeks to 20-30 minutes.
- Drove platform adoption to 2M+ LLM interactions within two quarters, with 5 apps in production and 20+ in active development.
- Enabled 3 strategic product launches (WoS Research Assistant, PrimoRA, PQRA) by providing LLM access, evaluation frameworks, and GenAI best practices to product teams.
- Defined platform vision, outcomes, and success metrics, building monitoring systems to track KPIs and maintaining roadmap alignment with business priorities.
- Achieved 90%+ on-time delivery of planned roadmap items through disciplined backlog management, requirements refinement, and stakeholder alignment
- Led AI education program reaching 1,000+ internal attendees via public webinar, plus monthly internal updates averaging 75 live participants.
- Created self-service AI platform documentation and wiki, enabling developers to onboard independently and reducing support burden.
- Delivered technical presentation on data readiness for production LLM applications at ODSC West.

Clarivate - Product Manager, Data Science **2021-2023**

- Reduced internal workflow from 3 systems to 1 for researcher discovery tool (Author Connect), partnering directly with users to understand needs and delivering solution that decreased response time for customer queries
- Delivered novel Research Landscape Monitoring tool as Product Owner; outcomes include reduced time for editorial investigations of “bad actors” and increased customer satisfaction with respect to data quality.
- Grew Patent Abstraction and Summarization Suite as Product Owner; delivered 6 machine learning models to automate content ingestion workflows, saving >$2M in 2022.
- Delivered AI-powered search capabilities for Web of Science, collaborating across UX, Engineering, and Product to ship semantic search, dynamic query modification, and query parsing—driving increased product engagement and renewals.
- Delivered and implemented vision for new Data Science Steering Group structure to ensure alignment between Product goals and Data Science projects; met success criteria definitions 94% of the time.
- Worked with Product and Business stakeholders to deliver a validated and prioritized backlog of Machine Learning projects; actionable projects exceeded team capacity by 50% on average over 2022.
- Built and managed data science internship program, recruiting first 2 interns, training mentors, and establishing success criteria—both interns completed successfully.

WORK EXPERIENCE cont.

Clarivate - Data Scientist **2019-2021**

- Delivered linear classifier for matching manuscripts to researcher records, with automated quarterly data updates and retraining. Reduced technical debt and retained first-in-class status, enabling $2M in annual revenue.
- Delivered improved GB Tree model for scholarly reference matching. 10% increase in automation, ~$0.5M in annual savings.
- Delivered GB Tree model for finding relevant researchers for email marketing product. Precision 50% greater than target. Reduced product delivery time by ~20% and mitigated tech debt for product with ~$3M in annual revenue

Galvanize - Data Scientist in Residence **2019**

- Worked with students in groups and individually to develop their data science skills and knowledge.
- Facilitated assessments, warmup sessions, team case studies, and individual projects.
- Contributed to development and refinement of Data Science curriculum.

Fashion Institute of Design and Marketing - Academic Coordinator **2007-2018**

- Optimized tutor scheduling through data collection and analysis, resulting in 15% increase in visits to learning center and greater student engagement.
- Developed alternative course scheduling plans for Business Management student to allow cohorts to start at any time of year.
- Worked with leadership team to develop and implement Student Success Seminar, resulting in increased performance from academically struggling students.

EDUCATION

Data Science Immersive, Galvanize, San Francisco **2018**
Master of Arts in Art History, San Francisco State University, College of Creative Arts **2007**
Bachelor of Fine Arts in Photography, San Francisco Art Institute **1999**

SKILLS

- AI & ML: LLMs, Retrieval-Augmented Generation, NLP, Document Intelligence, Semantic Search, ML Evaluation & Metrics
- Strategy & Product: AI Roadmapping, Product Discovery, Requirements Definition, Stakeholder Alignment, Success Metrics
- Domain: Pharmaceutical Market Access, Real-World Data, Healthcare Analytics
- Technical: Python, SQL, Cloud Platforms

SERVICE

San Francisco Composite Mountain Bike Coach, NICA NorCal HS Cycling League
San Francisco-Marin Food Bank, Volunteer, deliver food to families is need
826 Valencia, Volunteer Tutor for under-resourced students ages 6-18
National Laboratory for Education Transformation, CompareK12 Data Systems Advisor
